

Please do not consider making changes for the current FM service to LPFM. I currently listen to Air1 88.7 in Gilbert. This station offers my family an alternative station free of ads, vulgar language and no suggestive pornography type commercials.

I believe this station is a real value to the community providing alternative Christian music and a positive encouraging words each day vs the negativity we hear each day on the other secular stations.

I know several adults and young people that this change could seriously effect in our local community if we were to lose our Air 1 station due to FCC changes.

I support Air 1 financially each month to help keep them on the air and feel that I am helping the community by having this encouraging station on the air to reach out to others.

Many lives have been changed and people have been able to realize that thru Air 1 their music and encouragement given on the station the outreach makes people realize that they are cared about and not just a number. They do things like recruit help for the local Rescue Mission in the area for donations, volunteers food support ect. In fact I ended with my family by working as a volunteer at the mission for over 2 yrs and with a group of 10 teenagers who hang out with my daughter and another parent.

Please reconsider the impact that this community would have if you change things now. I will be praying that God will continue to bless this awesome ministry that Air 1 provides and that you at the FCC will make the only right choice of what to do.
